

RANDOX

TOXICOLOGY

Reagents

Reagents

Randox Toxicology offer superior third-party diagnostic reagents for the highest quality Drugs of Abuse (DoA) and Therapeutic Drug Monitoring (TDM) screening. Offering flexible pack sizes and a comprehensive list of analyzers applications, we also provide dedicated reagent packs (Randox Easy Read and Easy Fit reagents) for a wide range of chemistry analyzers providing you with freedom of choice from an independent manufacturer.

To complete the package Randox Toxicology offer a range of calibrators, quality control sera and EQA schemes for DoA and TDM Screening.

Test Menu

Drugs of Abuse Reagents	
Barbiturates	Ethanol
Benzodiazepines	Ethyl Glucuronide*
Cannabinoids	Methadone
Cocaine Metabolite (Benzoylecgonine)	Methamphetamine
Ecstasy	Opiate
EDDP	-

Therapeutic Drug Monitoring Reagents	
Acetaminophen	Phenobarbital
Carbamazepine	Phenytoin
Digoxin	Salicylate
Gentamicin	Valproic Acid
Lithium	-

*Not FDA approved

Benefits

Internationally Recognised

Randox reagents are globally recognised and trusted, through official accreditation to both national and international standards including UKAS, ISO 13485:2003, and FDA.

Accurate and Reliable

Our liquid ready-to-use reagents provide low false positives, ensuring results are of the highest quality.

Cost Consolidation

Compact packaging and up to 28 day open stability reduces wastage within the laboratory.

Exceptional Correlation

Excellent correlation with GC/MS provides a highly accurate solution for toxicology screening.

Ease of use

Liquid ready-to-use reagents, calibrators and controls offer convenient and simple to use solutions.

SciTeck® Compatibility

Compatibility with SciTeck® applications ensures adulterated samples do not evade detection.

Advancing the Future of Toxicology
