ELISA Plate Readers

We recommend two compact and robust ELISA readers, offering optimal performance with every test.

DS2 Plate Reader

DS2 is a compact, easy to use and innovative microplate reader designed with full walkaway capability. DS2 quickly and easily processes two 96-well microplates and up to 12 different assays simultaneously.

- Compact system
- Fully automated
- Fully integrated washing
- Instrument diagnostics
- Automated barcode reading
- Extensive on-board software

800TS Plate Reader

The 800TS is a robust microplate reader ideally suited for routine drug detection in the laboratory. Complete with touchscreen and USB capabilities, the high-quality microplate reader requires limited space for outstanding performance, with Gen5™ software available for advanced data handling and analysis.

- Compact system
- Speed reading
- Optimal performance
- High accuracy
- Multiple plate formats
- Gen5™ software
